Developer & Data Analyst | Next.js, TypeScript, PostgreSQL, SQL, Python, AI-assisted development

Summary

Developer and data analyst with a B.Tech in Computer Science and a Post-Degree Diploma in Data Analytics. I designed, built and run the booking and operations platform behind my own repair business (about 9,000 generated SEO pages and 547,000 Google search impressions since the February 2026 launch), and a privacy-first data product with 285 monthly active users. I build with AI coding agents every day and test what they produce, and bring years of IT support, device repair and customer service.

Work Experience

Founder & Full-Stack Developer
The Travelling Technicians | Burnaby, BC | July 2024 - Present
- Built and run the full booking and operations platform for my doorstep phone and laptop repair business (travelling-technicians.ca, 13 service areas): Next.js, React, TypeScript and Tailwind CSS on Vercel, with Supabase PostgreSQL (75 tables, 50+ triggers, 11 views, row-level security); 1,400+ commits since April 2025.
- Generated about 9,000 SEO pages from one dynamic route system (canonical tags, structured data, internal linking): about 2,850 Google clicks and 547,000 impressions since the February 2026 launch.
- Built an AI chat agent (DeepSeek, 18 tools) and voice agent (Retell) that quote repairs, create and reschedule bookings and queue after-hours callbacks from live pricing and availability.
- Integrated Stripe payments with webhook-verified confirmation, Resend email, Telegram alerts and four Cloudflare Workers (inbound email routing with two-layer authentication, plus three scheduled jobs).
- Build with Claude Code daily, plus Cursor and Codex, guided by AGENTS.md / CLAUDE.md; 190+ Jest test files, including guard tests that catch a hardcoded price or an unsourced customer-facing claim.
- Run the business: scheduling, quotes and GST/PST invoices, payments, follow-up and on-site repairs.

Store Supervisor (promoted from Service Technician)
London Drugs | Squamish, BC | January 2023 - July 2024
- Promoted twice in ten months after earning Apple ACMT and ACiT certifications; coordinated staff schedules, daily operations and customer escalations; led a team of eight to prepare the yearly inventory count.
- Diagnosed and repaired phones, laptops and peripherals; kept service records and ordered parts.

Delivery Driver (Self-Employed)
SkipTheDishes, DoorDash and Uber Eats | Metro Vancouver, BC | January 2022 - December 2022

Restaurant Operations Manager
Payal Chaat House & Restaurant | Surrey, BC | January 2021 - December 2021
- Managed daily operations, staff scheduling, inventory and customer service.

Customer Support & Platform Specialist
Intelnet Global Service | New Delhi, India | June 2018 - August 2019
- Supported MakeMyTrip customers (Amadeus) and Snapdeal sellers; trained users, reported recurring issues and supported UAT.

Projects

- **Immigration Timeline** (immigrationtimeline.ca), independent product, March 2026 - Present: Next.js, TypeScript, Supabase and Python (pandas, lifelines): Kaplan-Meier wait-time model trained on 127,684 stage transitions and checked with time-split backtests; privacy floor of 25 enforced in the database; 358 accounts, 2,259 milestones logged, 285 active users in the last 30 days (October 2026).
- **Raba Thrift** (rabathrift.ca), client contract, November 2025 - February 2026: 55-page donation and retail site for seven Fraser Valley communities; pickup requests are validated on the server, saved to Supabase and emailed to staff (Resend); Sanity Studio with ten editable content types and on-demand revalidation, so staff publish without a developer.
- **Indian Burger Joint** (indianburgerjoint.com), June 2025: multi-location restaurant site with food-ordering and franchise-inquiry paths, built in a few days for a friend's business.

Skills

Languages and web: TypeScript, JavaScript, SQL, Python, HTML, CSS, React, Next.js, Node.js, Tailwind CSS
Data: PostgreSQL, Supabase, Pandas, scikit-learn, Power BI, Excel, Google Search Console, data visualization
Integrations: REST APIs, webhooks, Stripe, Resend, Twilio, Sanity CMS, Cloudflare Workers
AI: Claude Code, Cursor, Codex, LLM tool calling, chat and voice agents, MCP servers
Practices: Git, GitHub Actions, Jest, Docker, Vercel, technical documentation
Support and languages: Apple ACMT and ACiT (2023); Windows, macOS, iOS, Android; UAT; English, Hindi, Punjabi, Urdu

Education

Post-Degree Diploma, Data Analytics - Langara College | Vancouver, BC | September 2019 - December 2020
B.Tech, Computer Science and Engineering - Maharshi Dayanand University, Rohtak, India | August 2014 - May 2018
